- [Proposal History to Mondelez](#)

Dear Mondelez.

Allow me to remind you below of my proposals to you, one of which is that of [jointly receiving and executing orders](#) with Chipita SA, which you implemented, with its acquisition and the acquisition of its distribution network. Obtaining huge benefits that you now have to manage properly and taking into account the special and now permanent conditions that prevail worldwide, the consequence of which is the limitation in the access to raw materials and goods of the food chain.

In 2018 I created a [site / e-shop](#) to show you the above-mentioned necessity of now jointly operating a distribution network of the snacks products that you mainly produce and supply worldwide and with other [snack producing companies](#).

As mentioned above, in 2021 you completed the acquisition of Chipita SA and acquired its distribution network.

On 29-03-2020 I notified you of my letter - proposal to all large houses that house and produce living and food goods. [More details](#).

I did not communicate this to the Supreme State, Political and Judicial actors of the country. [More details](#).

On 18-12-2023 I notified you of my letter - proposal to our Prime Minister for a global distribution network. [More details](#).

On 12-26-2023, I posted on the website that is being created to present a global proposal for the distribution of food and living goods, my letter to the global companies for the distribution of food and living goods products, and of course to you. [More details](#).

On 28-12-2023 I communicated my proposal to our Prime Minister Kyriakos Mitsotakis, as I believe that this proposal of mine should also be supported by governments around the world.

This is imposed by the now emerging conditions of the reduction of food and living goods produced, due to the permanent and now unfavorable conditions that have been created for humanity and the planet. [More details](#).

On 06-01-2024 I posted on the website of my global proposal for the creation of a global distribution network, my letter to the prospective investors of my proposal - venture. These people know and must be ready to suffer very large losses from their investments due to the unfavorable conditions now taking shape for humanity and the planet. My proposal gives them the opportunity to recoup some of their losses by investing now in this very proposal of mine, but also more generally in new emerging business models around the world to fill the void that is going to be created by the mass future global bankruptcies of large economic and productive, traditional companies. [More details](#).

Dear Mondelez.

As you already know I singled you out to take the lead and become a founding executive of my global proposition.

I must inform you that the presentation of my global proposal is not complete.

What is missing is the part that, through my global proposal for the creation of a global distribution network, is going to give the possibility of locating the production and distribution of each of the produced products. In other words, anyone, wherever they are, whoever they are, will be able to find, through the same website [www.global-pdn.com](#), about a specific product they are interested in, that it is available to acquire. A possibility that must receive global support from governments around the world and the best suited to do this is our Prime Minister Kyriakos Mitsotakis who has now emerged as a global power to influence global developments with his wisdom and political skill, recognized by the global leaders of the world among whom it moves with great comfort and confidence, influencing global developments.

Dear Mondelez.

You implemented my proposal for a joint distribution network by acquiring the very company that I suggested you partner with to acquire a distribution network.

For this proposal of mine that brought you enormous financial benefits and made you an independent corporate force for the production and distribution of your products, I personally not only had no benefit, but on the contrary I faced a very big rejection and financial war at the local level from the decision-makers who in Rhodes they represent you, expressing ingratitude.

But for you, I have dedicated a lot of time and money to show you the direction you should now follow, leading the global developments.

Now what are you going to do with my new proposal for the creation of a global product distribution network, for which I suggest you become a founding member?

Dear Mondelez.

Allow me a parallel.

The naval battle of Salamis has emerged as a naval battle that, with the victory of the Greeks against the Persians, determined the evolution of humanity and especially of the so-called Western world in the form it exists today. Besides, if the Persians had prevailed, this world would not have been as we know it today and, in general, it would not have evolved in the form we know it today.

Such a "naval battle" is developing today on a global level in the midst of worsening situations for the existence and perpetuation of humanity.

My proposal comes to provide for these bad future developments that are now visible.

Dear Mondelez.

What will you do this time? Are you going to ignore me again?

You must know that the victory of the Greeks over the Persians in the naval battle of Salamis is solely due to the creation of a flexible naval force that prevailed state by state against the cumbersome naval force of the Persians in the straits of Salamis.

The global product distribution network that I propose you to become a founding member of is based on my own stimuli and experiences of more than fifty years for your products and in general for food and living products.

Dear Mondelez.

Do you intend to ignore this and in general everything above that comes to your knowledge?

Dear Mondelez.

I am waiting for a positive approach from you.

Rhodes 21-07-2024

Sincerely,

[Thomas X. Spanos](#).
